COMPETENCIES

- Software Development and Testing
- System Enhancements
- Solutions Deployments
- Data discrepancy analysis
- ETL Process anomaly detection
- User Acceptance Testing

EXPERIENCE

INDUS VALLEY PARTNERS   **MUMBAI, INDIA**
Associate Software Engineer   Jan 2022 - Present
- Contributed in several modules by developing, testing and deploying - Tables, Stored Procedures, Views, Azure Data Factory Pipelines, .NET code, React code.
- Created / revamped / enhanced blotters in Data Portal. Reformed blotters with multiple dropdowns responsible for API calls and filtering. (Blotter - Web Application Reporting tool)
- For daily Data Quality Management Report, sustained the report format and checks, and documented all up-to-date queries and steps used to manually prepare the Report and share with the client team to inform conclusion of the orchestration process (Orchestration - Scripted Extract Transform Load process)
- Automated the daily Data Quality Management Report using Azure Data Factory Pipelines, SQL Stored Procedures, supporting SQL Tables in DataWarehouse and Synapse, SQL View and SSRS Report, .
- Investigated data issue / ETL process failure issue, proactively communicated issues and possible remedies with team and fixed the same to avoid losing latest data.
- Developed a module end-to-end and stepped into ownership by maintaining data quality and supervising each orchestration. (Orchestration - Scripted Extract Transform Load process)
- Refined and sustained Data Dictionary which helps client team and dev team both to search/identify source columns/tables of several Data Portal Blotters / Synapse Tables / Synapse Views / DataWarehouse Tables.
- Mentored juniors and new resources for onboarding.
